For Attendees

All participants are invited.

If you have any questions for the speaker, type them into the question box.

Questions will be addressed during the discussion portions of the webinar. Please type them in as we work your questions.

Find your breakout on your attendee control panel

**PDF will be emailed to you prior to webinar - **

---

Webinar Objectives

Legislative Day participants will:
- Describe the importance of advocacy, “speaking up” for our profession and maintaining ongoing relationships with legislators.
- List three advocacy actions food and nutrition professionals can engage in to optimize the health of all Oregonians through food and nutrition.
- Identify their state legislators and how to contact them.
- Apply food and nutrition expertise, represent Oregon RDNs and “ask” legislators/staff for support of bills.

---

Introduction of Speakers

Rachel Berton, RD, LD
Rep. Karin A. Power, JD
Rep. Maxine Dexter, JD
Terese M. Scollard, MBA, RDN, LD, FAND
Matt Newell-Ching
Becky A. Johnson, MS, MA, RDN, LD
Speaker Disclosure

• No speaker has received compensation for this presentation

Today's Agenda

• Federal Legislative Update
• Meet & Greet & Panel Discussion with Oregon State Legislators
• Current Policy Landscape on Disease-Related Malnutrition
• Addressing Hunger & Food Insecurity in the 2021 Oregon Legislature
• Launching the 2021 Oregon Academy of Nutrition & Dietetics Virtual Advocacy Campaign
• Q & A

Question #1

Have you participated in an Oregon Academy of Nutrition & Dietetics Legislative Day in the past?

Yes
No

Federal Legislative Update

Oregon Academy Legislative Day
March 9, 2021
Rachel Berton, RD, LD
Public Policy Coordinator
Federal Public Policy Priorities

Disease Prevention and Treatment
- Support medical nutrition therapy to reduce risk of chronic disease
- Fund evidenced-based nutrition interventions
- Support nutrition research

Lifecycle Nutrition
- Prenatal, Maternal and Infant Health
- School Age Children
- Older Adults

Healthy Food Systems and Access
- Food security
- Food systems supply and management
- Nutrition Education

Quality Health Care
- Patient-centered nutrition interventions
- Workforce demand
- Quality measures
- Reimbursement

Health Equity
- Health disparities
- Cultural competency
- COVID-19

Medical Nutrition Therapy Act
- Expands access to nutrition counseling to individuals with chronic disease for Medicare beneficiaries.
- MNT is a cost-effective, evidence-based solution to provide nutrition counseling to individuals with multiple chronic diseases.
- Included conditions for coverage under Medicare Part B:
  - Prediabetes;
  - Obesity;
  - Hypertension;
  - Dyslipidemia;
  - Malnutrition;
  - Eating disorders;
  - Cancer;
  - Celiac disease;
  - HIV/AIDS; and
  - Any other disease or condition causing unintentional weight loss.
Academy’s Action Center page: https://www.eatrightpro.org/advocacy/take-action/action-center

1. Welcome new Congress members to the 117th Congress
2. Tell Congress to prioritize nutrition funding
3. Support Diversity in Nutrition and Dietetics in Allied Health Professions

Thank you!
Any questions or concerns?

Meet & Greet & Panel Discussion with Oregon State Legislators

Rep. Karin A. Power, JD
District 41, Milwaukie (D)

Rep. Maxine Dexter, MD
District 33, Portland (D)

What are your top legislative priorities for 2021?
Rep. Power: In 2019 you championed legislation to ensure all Oregon employees are given needed rest periods to pump breast milk or breastfeed during a child’s first 18 months, legislation that was strongly supported by our own membership. Could you speak a bit about your process and motivation for championing this legislation?

Rep. Dexter: Among your committee assignments, you serve on the House Committee on Health Care and as the chair of the House Sub-Committee on COVID-19. Could you speak a bit about the work of these committees, especially in regards to health care delivery systems and telehealth?

Rep. Power: In addition to your work in the Oregon Legislature and with the Freshwater Trust, you have served as a board member of the Oregon Food Bank and Spirit Mountain Community Fund. How have these experiences shaped your work in the Oregon Legislature?

Rep. Dexter: In addition to your work in the Oregon Legislature, you are a pulmonologist and critical care physician who has treated some of the sickest patients with COVID-19. How has this experience shaped your work in the Oregon Legislature?
Registered Dietitians are formally trained nutrition experts with active continuing education requirements to assure we are up to date. How might we best interact with lawmakers to assure decisions are made with the benefit of relevant nutrition information and data?

ASPN Statement: Global Leadership Initiative on Malnutrition (GLIM)

- In response to learning that some auditors are looking for use of the GLIM criteria in U.S. inpatient hospitals, the ASPEN Malnutrition Coding and Reimbursement Task Force, which includes representation from the Academy, has issued the following statement in GLIM in order to better clarify how and where such tools should be used in clinical practice:
- The Global Leadership Initiative on Malnutrition (GLIM) has identified the common malnutrition diagnosis criteria that are currently in use throughout the globe. These widely applied criteria were used to develop a construct for malnutrition diagnosis in adults in ambulatory and hospital clinical settings that is feasible for application by clinicians with limited nutrition expertise around the globe. The focus of GLIM is on assessment tools and methods that are readily available. The GLIM criteria seek to provide a global framework for malnutrition diagnosis that may be complemented where available by consultation of skilled nutrition practitioners to conduct comprehensive nutrition assessments. GLIM provides a framework to guide malnutrition diagnosis.
- GLIM is based upon the common phenotypic (body weight, body mass index, and lean mass) and etiologic criteria (reduced food intake or assimilation and disease burden/inflammatory condition) that are found in the leading approaches to malnutrition diagnosis. GLIM is fully congruent with established approaches like Academy/ASPEN criteria and Subjective Global Assessment (SGA). They share multiple variables and are not inconsistent. GLIM, Academy/ASPEN criteria or SGA may be used independently to diagnose malnutrition.
- GLIM can trigger a full nutrition assessment by skilled nutrition practitioners as part of developing a malnutrition treatment plan.
- GLIM may be used in combination with other approaches and additional criteria of regional preference.
- In settings where skilled nutrition professionals are less available, GLIM could be used alone.
- It is important to the quality of patient care to recognize and treat malnutrition, no matter what tool is used.
- Both the Academy/ASPEN and GLIM approaches are undergoing validation testing. Building upon the GLIM approach, it may ultimately be possible to derive a minimum dataset of key core criteria that will provide a framework to serve a broad range of practitioners in a variety of clinical nutrition settings. It is hoped that by collecting the core GLIM variables in a consistent manner, it will then be possible to compare prevalence, interventions, and outcomes on a global scale.

defeat malnutrition today
Working together to defeat older adult malnutrition

https://www.defeatmalnutrition.today/
107 national, state and local member organizations.

Blueprint
Outlines potential actions to improve health outcomes for older adults by addressing malnutrition care across the continuum of acute, post-acute, and community settings.
Provides suggested strategies for policymakers, organizations, healthcare providers, patients and caregivers to address malnutrition.

State Legislative Tool Kit
Ohio, Massachusetts, Florida, Connecticut, Georgia, New Mexico, Texas, Virginia

MNT Act 2020 > stay tuned
• Bill amends the Social Security Act to provide Medicare Part B coverage of outpatient MNT for:
  • prediabetes
  • obesity
  • high blood pressure
  • high cholesterol
  • malnutrition
  • eating disorders
  • cancer
  • celiac disease
  • HIV/AIDS
  • and any other disease or condition causing unintentional weight loss

Sarcopenia
• Sarcopenia is the age-related decline in muscle health
• Asian, USA and European definitions and cut points
• Update in 2019 in USA FNIH SDOC2
  • Handgrip Strength
  • Gait Speed
• Academy group: international review for potential addition to the Nutrition Care Process
• Some researchers recommend:
  • If malnourished, screen for sarcopenia
  • If sarcopenic, screen for malnutrition
  • “Low grip strength, but not lean mass, is associated with poor health outcomes in older adults”.
  • “Both low grip strength and low usual gait speed independently predicted falls, self-reported mobility limitation, hip fractures and mortality in community dwelling older adults”.
  • ICD-10 CM Code M52.84

Free webinars, recorded and posted. International researchers reviewing their research focus and discussing body composition methods, technology, applications, clinical outcomes, role of nutrition.

Enhanced Recovery After Surgery (ERAS®)

- Integration of nutrition into overall patient management
- Nutrition Risk Screen and action on results
- Metabolic control (blood glucose)
- Immunonutrition
  - Arginine
  - Fish oil
  - Nucleotides
  - Protein
- Curtailed fasting pre-op
  - Pre-op clear liquids
  - Hydration & carbohydrates
  - Early post-op oral diet and fluids (w/in 24 hours)
  - Recovery

COVID-19 Malnutrition

- Infection is associated with malnutrition risk
- Disease-related malnutrition puts immunocompromised individuals at a higher risk of contracting
- Symptoms may influence nutrition status/immunity: fever, cough, shortness of breath, muscle ache, confusion, headache, sore throat, chest pain, pneumonia, diarrhea, nausea and vomiting, and loss of taste and smell
- Symptoms compromise nutrient intake and increase the risk for malnutrition.
- Older age and the presence of comorbid conditions associated with compromised nutrition status and sarcopenia.
- High body mass index seems related to poor outcomes and suggests sarcopenic obesity plays a role

Addressing Hunger & Food Insecurity in the 2021 Oregon Legislature
Oregon Academy Legislative Day
March 9, 2021
Matt Newell-Ching
Public Policy Manager, Oregon Food Bank
Oregon Food Bank

Our mission is to end hunger and its root causes.

- Food distribution through 20 regional food banks and 1,400 partner agencies
- Changing systems that allow hunger to perpetuate, including systemic racism.

2019 – Victory for Hunger-Free Schools

- Significantly increased the number of schools offering meals to all students at no charge, reducing hunger and stigma
- More students eligible for school meals.
- More schools serving breakfast after the bell

2021 Priorities

- Double-Up Food Bucks (SB 555)
  - Increase access to fruits and vegetables at grocery stores
- College Student Hunger (HB 2835)
- Housing Access and Affordability
- Immigrant Rights
- Federal:
  - Child Nutrition Reauthorization (WIC, school meals, out-of-school time meals)
  - Inclusive COVID Relief

2021 Oregon Academy of Nutrition & Dietetics Virtual Advocacy Campaign
Oregon Academy Legislative Day
March 9, 2021
Becky A. Johnson, MS, MA, RDN, LD
State Policy Representative, Oregon Academy of Nutrition & Dietetics

Question #2
In the past year, have you worked with an individual facing food insecurity?
- Yes
- No

Question #3
In the past year, have you conducted a telehealth visit, as a practitioner, intern or student?
- Yes
- No
SB 555 – Double Up Food Bucks

- Requires DHS to contract nonprofits to administer program for SNAP recipients to purchase locally grown fruits & vegetables from farmers' markets, farm share sites & retail outlets
- $4 million appropriation per biennium (through 2024)
- Matches the amount a SNAP beneficiary spends on purchasing fruits & vegetables
- SNAP beneficiaries can purchase more fruits & vegetables
- Benefits local farmers with increased sales

HB 2508 – Telemedicine Flexibilities

- Requires OHA to ensure reimbursement of health services delivered using telemedicine (physical, BH & oral care)
- Applies to CCOs & Oregon Medicaid
- Applies to licensed health care providers
- Ensures reimbursement of health services at same rate as in-person services, if service is covered benefit
- Acceptable modes – landlines, mobile phones, internet
- Takes effect upon passage

Step 1: Find Your Legislators

- [Link to find your legislators](https://www.oregonlegislature.gov/FindYourLegislator/leg-districts.html)

Step 2: Contact Your Legislators (by phone)

- Introduce yourself
- Identify yourself as a constituent and member of the Academy of Nutrition and Dietetics (if applicable)
- Ask for their support of SB 555 (Double Up Food Bucks) and HB 2508 (Expanding Telemedicine Flexibilities) – talking points provided!
- Ask if you can count on your Representative/Senator’s support
- Ask who you’re speaking with
- If no one answers, leave a message!
Special Thanks – Co-Sponsors
SB 555 Sponsors
Sen. Geiser
Rep. Marsh
Sen. Knopp
Sen Prozanski
Sen. Taylor

HB 2508 Sponsors
Rep. Prusak
Rep. Alonso Leon
Rep. Clem
Rep. Neron
Rep. Schouten
Rep. Williams

Step 3: Complete Surveys
✓ Complete Legislative Day Evaluation Survey (link in email)
✓ Complete Legislative Day Action Survey (reporting on your completion of the advocacy action)

Each action = 1 entry to win 1 of 3 $25 Amazon gift cards!

Action Deadline is April 30, 2021

Summary – Legislative Day Actions
• Watch your e-mail inbox
• Find your legislators
• Complete advocacy campaign
• Complete evaluation survey
• Win a prize!

2021 Oregon & Washington Conference
