

Nutrition Practice Care Guidelines for Preterm Infants in the Community 2013 Revision

Oregon Appendix

Oregon Appendix to the Nutrition Practice Care Guidelines for Preterm Infants in the Community, 2013 Revision

Providing optimal care for premature infants in the community and their families requires care coordination. Care coordination takes an understanding of what services are available in the community and how to qualify and access these services. The purpose of the Oregon appendix is to connect health care providers, advocates and families with contact names of individuals and organizations.

Change is constant. We recognize that information is likely to change as soon as the document is published. But it is a start and we hope it is a useful and dynamic resource. Please submit suggestions for additions, changes to the attention of the Oregon Pediatric Nutrition Practice Group at oda@guidnunc.net

Oregon Public Health Nurse Services

Babies First!

Babies First! is a nurse home visiting program for families with babies and young children up to age 5. The goal of Babies First! is to help families make sure that their babies are healthy as they grow and learn.

Nurses visit you and your baby at home and can:

- Weigh your baby
- Help with breastfeeding
- Check to make sure your child is learning and growing, as they should
- Help you keep your child's teeth and smile healthy
- Offer information about what to expect as your child grows and develops
- Help you build a happy, loving, and fun relationship between you and your child
- Answer questions about keeping yourself and your child healthy and help you know when to see the doctor
- Help you recognize what your child is telling you before he/she can talk
- Help you make your home safe for your child
- Work with you to solve problems that affect your family's health
- Help you get health care and/or apply for the Oregon Health Plan
- Refer you to other services you might need

For more information, contact your local health department or visit the Oregon Babies First! page, at <http://public.health.oregon.gov/HEALTHYPEOPLEFAMILIES/BABIES/HEALTHSCREENING/BABIESFIRST/Pages/index.aspx>

CaCoon

The CaCoon is a (**CA**re **CO**ordinati**ON**) service for families with children from birth to age 21 who have (or are at risk of having) a chronic health condition or disability. CaCoon care coordination services are offered by public health nurses who are specially trained to care for children and youth with special health needs. Since family members have a central role in the care of their child, all services are planned around the desires and concerns of the family. Eligibility is not tied to family income or insurance status. There is no cost to families for CaCoon services.

A CaCoon nurse works with your family and your child's health care providers to do some or all of the following things:

- Help you find information about your child's condition
- Screen your child for any concerns regarding development, nutrition, hearing, vision, or other health issues
- Partner with you to advocate for your child and family
- Help you family locate financial assistance to help pay for your child's care
- Refer you to parent or family support organizations
- Refer you to local resources for early intervention - physical, occupational, speech, and preschool
- Work with any other service providers to address your concerns

For more information, contact your local health department or visit Oregon Health & Sciences University website, at:

STATE PROFILE 2012

NURSE-FAMILY PARTNERSHIP IN OREGON

Nurse-Family Partnership (NFP) is an evidence-based, community health program that helps transform the lives of vulnerable mothers pregnant with their first child. Each mother served by NFP is partnered with a registered nurse early in her pregnancy and receives ongoing nurse home visits that continue through her child's second birthday. Independent research proves that communities benefit from this relationship — every dollar invested in Nurse-Family Partnership can yield up to five dollars in return.

NURSE-FAMILY PARTNERSHIP GOALS

1. Improve pregnancy outcomes by helping women engage in good preventive health practices, including thorough prenatal care from their healthcare providers, improving their diets, and reducing their use of cigarettes, alcohol and illegal substances;
2. Improve child health and development by helping parents provide responsible and competent care; and
3. Improve the economic self-sufficiency of the family by helping parents develop a vision for their own future, plan future pregnancies, continue their education and find work

Positive Outcomes for Clients Served by Oregon's Nurse-Family Partnership

93% of babies were born at a healthy weight - at or above 2500 g (5.5 lbs)

91% of babies were born full term

93% of mothers initiated breast-feeding and 49% continue to breastfeed at child age 6 months

42% of mothers who entered the program without a diploma/GED have since earned one, and another 15% are working toward obtaining one

CLIENT DEMOGRAPHICS

At intake

Median age: 19

83% Unmarried

47% Medicaid recipients

Cumulative data as of Sept. 30, 2011

Race

2% American Indian/Alaska Native

1% Native Hawaiian/Pacific Islander

Ethnicity

52% Hispanic/Latina

46% Non-Hispanic/Latina

2% Declined to self-identify/
No response

Data Oct. 1, 2010 - Sept. 30, 2011.

All data is client self-identified.

In Oregon, Nurse-Family Partnership currently serves clients in Crook, Deschutes, Jefferson and Multnomah Counties.

IMPLEMENTING AGENCY CONTEXT

The Multnomah Nurse-Family Partnership is implemented by the Multnomah County Health Department. It began in 1999 with four nurses and has continued to grow and expand over the years to 18 nurses today. In Deschutes, Jefferson and Cook counties, the program is operated under a tri-county partnership between the three county Health Departments. For all NFP agencies in Oregon, NFP operates side-by-side with the other home visiting programs provided by the Health Department, creating a continuum of care for families in the community.

FUNDING AND POLITICAL CONTEXT

Varied funding sources support Nurse-Family Partnership in Oregon, including: Oregon Healthy Start, Juvenile Justice Prevention funding, Medicaid maternity case management, targeted case management and general county funds and the federal Maternal, Infant and Early Childhood Home Visiting Program funds.

PUBLIC HEALTH PROGRAM WITH PROVEN AND MEASURABLE RESULTS

Societal Benefits

Nurse-Family Partnership is a rare community health programs that is based on evidence from randomized, controlled trials – more than 30 years of research proves that it works.

This evidence shows our clients – eligible first-

time mothers – that if they follow the program and work with their nurse, they can transform their lives and the lives of their children. Moreover, independent policy research makes clear that every public health dollar policymakers and communities invest in Nurse-Family Partnership could realize up to five dollars in return.

National Recognition

- The Washington State Institute for Public Policy, The RAND Corporation and The Brookings Institution have concluded that investments in Nurse-Family Partnership lead to significant returns to society and government, giving taxpayers a \$2.88-5.70 return per dollar invested in the program.
- The Office of Juvenile Justice & Delinquency Prevention (OJJDP) recognizes Nurse-Family Partnership as an Exemplary Model Program.
- The Partnership for America's Economic Success finds investments in early childhood programs, such as Nurse-Family Partnership, to be stronger

investments than state business subsidies when viewed from a long-term, national perspective.

- The non-profit, non-partisan Coalition for Evidence-Based Policy finds “strong evidence of effects on life outcomes of children and mothers” by Nurse-Family Partnership.
